Technical Skills:

- Programming Languages: Python Java SQL and AIML.
- Web Technology
- Operating Systems: Windows 10 & 11.
- Tools: Edit plus VisualStudioCode Jupyter Notebook
- Good Communication and Organizing skills
- Time management
- Teamwork and collaboration.

Projects:

Create a Digital Clock Using Web Technologies

Description: Scope of this project is to create a digital clock. In this web development, you can create a digital clock Using HTML,CSS, and JavaScript. The HTML part defines the structure of the clock, the CSS is used for styling, and JavaScript is responsible for updating the time.

you can use the Date object in JavaScript to get the current time and then update the clock display accordingly.

Creation of Online Shopping Cart System using Java

Description: A code which implements an online shopping cart system that allows users to browse products, add or remove items from their cart, update quantities, and proceed to checkout. It manages product details, calculates totals (including taxes and discounts), and handles order processing and inventory updates. The system uses Java's object-oriented features and may interact with a database to store user, product, and order information, providing a modular and scalable foundation for an e-commerce application..

Strengths:

- Good Communication Skills
- Adaptability
- Time Management
- Teamwork

Hobbies:

- Cooking.
- Browsing on internet.
- Learning new things.

Personal Identity:
